          Mo Simpson, Media Resources                Hilary Clark, Retail Fashion  
          Eileen Steele, Humanities                Carol McQuarrie, AUCE Rep., Music

---

Projects proposed to date are:

OPEN HOUSE: MARCH 9 - 10, 1979

## RETAIL FASHION:

- has proposed a design competition, which will be held during Open House
- is organizing a humorous musical revue of Capilano's History, involving all Career departments. The first steps are now underway in approaching people to write the scripts and organize the music for the evening. It is planned to be presented in the Cafetheatre - along the theme of the trials and tribulations involved in being a student.

## MEDIA RESOURCES:

- requested that \$400.00 be set aside for a special tape-slide presentation to be put together. This will be accomplished by Edna Stakata - so the money represents only the cost of materials. A formal request will be submitted to the Principal for the cost of production, and this proposal was supported by all those present.

## HISTORY:

- Robert Campbell has proposed that a North Shore Canadiana exhibit be mounted. The display would be made up from donations from community members (who would receive credit for lending their material and would have guarantee of safe return of the items). The committee members need to have a more specific description of how this project would be mounted. In support of this, Hilary Clark said that Retail Fashion would be willing to put on a mini-fashion show in conjunction with this to model their historic costume collection.

## ANTHROPOLOGY/SOCIOLOGY:

- a film festival has been proposed - requiring an estimated \$300.00 in funding for rental of special films. It is proposed to take place for six evenings in February, with two of the offerings to be scheduled for times on the OH weekend. The committee asked that Geordie Tocher's film be included in this presentation.

## GEOGRAPHY:

- joint project with outdoor recreation - an orienteering weekend - with training in map reading, etc. The committee recommended that the on-campus lecture be for Saturday and the off-campus trip be on Sunday, after the OH activities.

## BUSINESS MANAGEMENT:

- planning a computer display - possibly with printouts of cartoons and calendars for visitors. They will also take an active part in "marketing" the OH days to the community.

## NATURAL SCIENCES:

- planning a high school science project competition - judging to be held on campus during Open House.
